

We are IFS Coatings

"Our mission is to deliver unparalleled service and product to the industry while providing the environmentally responsible choice."

Who We Are

At IFS Coatings we're proud of our company, proud of our team and proud of our products and service. Our mission is to deliver unparalleled service and products to the industry while providing the environmentally responsible choice. We have been delivering on this since 1999, and have grown steadily to be the successful company, supporting our customers in their coating needs, that we are today.

Our Team

Our team **is** IFS Coatings. The company is nothing without the diligent, loyal, skilled and passionate people we have in place. The IFS culture is a key part of IFS and is important to everyone in the company. With our mission, pillars of service, values and behaviors, each member of the IFS team understands just what it takes to deliver on the IFS promise. We value and expect integrity, excellence, adaptability, accountability and passion in our team, and we're proud of our dedicated, hardworking, professional employees, who boast years of experience in their fields, and who come together to serve our customers each and every day.

Service

We believe in ensuring our business is customer focused, flexible and responsive to our customer's needs. Service is at the heart of what we do – it's first in our mission for a reason. Our four pillars of service are:

- Responsiveness
- Expertise
- Reliability
- Customization

We strive to meet them each and every day.

We excel in delivering flexibility in batch sizes, industry leading turnaround times and color customization as standard. Our state of the art production facilities and strategic network of warehouses are carefully located to ensure rapid delivery across North America and beyond.

Our production facilities and quality control systems are designed for superior quality while allowing competitive pricing and fast turnaround times. By using the most advanced technologies, our experienced R&D staff can provide customized solutions to the most difficult application problems and our professional color lab create fast turnaround color matches to our customer's exact requirements. We love working with our customers to create something special just for them.

Products

We manufacture a full range of thermoset and thermoplastic powder coatings for metal substrates in a range of chemistries and thousands of colors and special effects. Our thermosetting powders are sold under our **IFS** and **Polychem** brands and also include **Purecoat**, our high quality selection of clear coats, and **Pureflex**, our **Fusion Bonded Epoxy powders**. **Puroplaz™**, the world class thermoplastic powder coatings from IFS Coatings, have been formulated to deliver a tough, functional and protective film for a wide range of applications. **IFS PureClad®**, our powder coatings for alternate substrates, add yet another string to our bow, providing incredible coatings that can be utilized on wood, MDF and more.

Environmental Responsibility

Providing the environmentally responsible choice is at the heart of what we do. It's part of our mission so it guides our everyday business. Sustainability is important to us, from the products we create – and we choose not to manufacture liquid paints due to their solvent content – to how we run our company and the choices we make. We are constantly looking at ways to improve our environmental footprint internally - from energy saving processes, packaging initiatives and taking on our employees' ideas to improve, and externally - from the products that cure at lower temperatures to the Environmental Product Declarations we achieved for our architectural range.
